

Reforming FSCO

IS THERE A CURE FOR REGULATORY DISEQUILIBRIUM?

CONSTRUCTIVE DIALOGUE compels us to ask ourselves the following questions about Ontario's auto insurance regime:

- Are both high auto insurance premiums and well documented claims handling inequities symptomatic of common root cause?
- If so, does root cause extend beyond the regulations themselves?
- Should stakeholders be elevating the discourse about personal injury benefits to a level that encompasses service process design, controls, operational performance and accountability?
- What role can FSCO play in re-establishing equilibrium in a fractured system?

The distinguished speakers in this engaging seminar will offer compelling observations, and perspectives on improved auto injury benefits regulation and its administration. It will be of interest to:

- Disability case managers
- Personal injury legal professionals
- Health professionals
- HR professionals desiring insights into co-ordinated return-to-work strategies
- Benefits consultants having disability benefit expertise.

Kitchener **Wednesday, June 12, 2013**
