**FREE 30 MINUTE Lunch Webinar:**

**PROTECTING PATIENTS WHO MAY BE EXHIBITING SIGNS OF INCAPACITY**

Injured persons encounter a number of obstacles in their treatment and rehabilitation journeys. One of these obstacles may include an injured person's inability to understand and appreciate their personal needs and finances. This can result in persons not receiving (and sometimes even refusing or mismanaging) all of the necessary treatments, therapies, and/or assistance they need.

During this **30 MINUTE FREE LUNCH WEBINAR**, Certified Capacity Assessor Carol Caverzan and our team will help you to:

- Learn about the various types and definitions of incapacity your patients may be experiencing;
- Identify the indicators of possible incapacity;
- Learn who has the expertise and qualifications to assess capacity; and
- Better understand what you can do, as treatment providers or evaluators, to ensure that your potentially incapacitated patients' interests (*and yours*) are adequately protected.

We believe this webinar will be of particular interest to occupational therapists, speech language therapists, case managers, social workers, and clinical psychologists. If you have a patient exhibiting the potential signs of incapacity to manage their own property or personal care, we believe you will find this webinar of great value. We look forward to seeing you there!

**Presented by:**

**When:**

**Thursday, April 15**  
12:00 pm – 12:30 pm

**Where:**

Online webinar via  
Zoom (link to be  
provided  
upon registration)

**Speakers:**

**Carol Caverzan, BA, BEd, MA, MSW,  
RSW**

**Greg Monforton, LL.B., C.S.**  
Partner, Greg Monforton & Partners

**Jaclyn Habas, B.A. (Hons.), J.D./J.D.**
